- Networks, servers and private cloud
- Forge
- SIMROOM

One team. From brief to operation.

Production, software, AI and hardware.

Turnkey event delivery.

Each profile explains the scope, availability and providers involved.

LIVE4K digital production

BY ARRANGEMENT

Digital content.
Made for business.

Creative content for businesses: video, photography, graphics, VR180/360 and live streaming, from the first idea to the finished deliverable.

Video production · Photography and graphics · Immersive formats · Connected event content

Rights, contributor permissions and publication responsibilities must be agreed.

Videopodcasts and interviews

BY ARRANGEMENT

Your expertise.
A new audience.

B2B videopodcasts and interviews produced in authentic settings. You arrange the guests; LIVE4K handles preparation, equipment, filming and post-production.

Location-based recording · Production preparation · Post-production

This offering is focused on B2B content.

Technical event production

BY ARRANGEMENT

Your event.
Our technical team.

Stage, projection, sound, lighting, recording, photography, live streaming and technical support for interpretation, coordinated as one solution.

Technical planning · On-site AV · Streaming and recording · Interpretation support

Equipment, crew size, travel and operating hours are project-specific.

LIVE4K Lighting

BY ARRANGEMENT

Large spaces.
Individual light.

Colour lighting for large areas using our own RGB modules, individual control of lighting points and a shared lighting direction.

Custom RGB modules · Individual point control · Spatial effects · Lighting direction

Rules, output, mounting and environmental suitability must be checked per installation.

LIVE4K STREAM

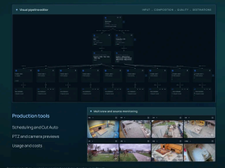

BY ARRANGEMENT

Live video.
Connected workflows.

Manage live video from inputs and compositions to output qualities, distribution, HLS playback and recording, with an API for integrations.

Inputs and compositions · Output qualities and distribution · HLS playback and recording · API integration

Support for a video protocol does not imply a complete social-account publishing API.

STAGE turnkey event service

TURNKEY SERVICE BY LIVE4K · SOFTWARE BY BIZWANTS

More languages.
One live programme.

Turnkey interpretation, translation and captions. LIVE4K provides setup, equipment and operators; STAGE software is supplied by BizWants.

Turnkey delivery · Equipment and operators · AI translation · Live captions

STAGE software is supplied by BizWants. LIVE4K offers a turnkey event service with equipment and operators, rather than its own software product.

Digital employees

INTERNAL LIVE4K PROJECT

Agent teams.
Controlled workflows.

LIVE4K's internal platform for agent teams, tasks, preparation and approvals. We use the experience to design controlled business processes and limited IT tools.

Agent teams and tasks · Preparation of materials · Approvals · Bounded tools

The described platform is internal: the public profile does not provide access or imply a ready-made subscription.

RemarketAgent

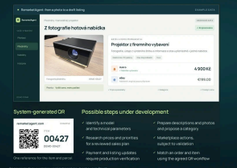

IN DEVELOPMENT

Unused equipment.
A reviewed next step.

An AI workflow in development for preparing business equipment for resale: photos and QR identification, item recognition, a reviewed sales plan and subsequent steps for supported marketplaces.

Photos and QR identification · Item recognition · Sales planning · Marketplace steps

This project is in development and is not presented as a finished production resale service.

Software and web applications

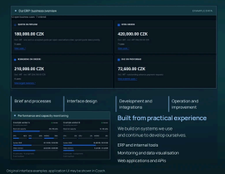

BY ARRANGEMENT

Your process.
Your application.

Design, development and ongoing improvement of business applications, system integrations and automation of repetitive work.

Business applications · API integrations · Automation · Ongoing development

Features, source delivery, hosting, support and service levels are contractual scope decisions.

Networks, servers and private cloud

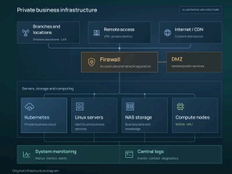

BY ARRANGEMENT

Your systems.
A connected foundation.

Design, deployment and management of private networks, Linux servers and a Kubernetes-based business cloud, with operational monitoring.

Network design and deployment · Linux servers · Kubernetes-based cloud · Operational monitoring

Architecture, backup responsibilities, recovery objectives and service levels require explicit agreement.

Hardware development and manufacturing

BY ARRANGEMENT

A physical idea.
A working system.

Custom hardware from mechanical 3D design and electronics through prototyping and manufacturing to software integration and controls.

Mechanical 3D design · Electronics · Prototyping and manufacturing · Software and controls

Certification, compliance testing, environmental ratings and production quantities require a separate agreement.

Forge

INTERNAL LIVE4K PROJECT

From an idea
to a 3D model.

LIVE4K's internal AI environment for parametric 3D design, visualisation, version history and STEP, STL and 3MF exports for subsequent engineering and print preparation.

Parametric modelling · Visualisation · Version history · Engineering exports

Forge is an internal project, not a publicly available design subscription.

Water-Sight

BY ARRANGEMENT

See changes.
Follow the water.

Monitor optical changes in water using a camera and reference target, with measurement history, images and alerts for configured thresholds.

Camera and reference target · Image analysis · History and images · Threshold alerts

Optical observation is not certified chemical analysis or certified NTU measurement.

SIMROOM

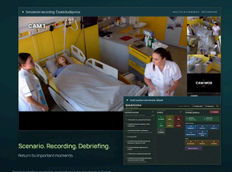

BY ARRANGEMENT

From a scenario
to a useful debrief.

An AV workflow for simulation training that connects scenarios, cameras, audio, recording, important-moment markers and subsequent debriefing.

Scenario workflow · Cameras and sound · Recording and markers · Debriefing support

Multi-track recording does not establish universally synchronised playback of every source.
